Hello there. Continuation from last time. I have a another reasons, so I thought to starting this column write in English. For example as Copernicus wrote On the Revolutions of the Heavenly Spheres『天球の回転について』 in Latin. Why does he wrote that in Latin? He guess his treatise be criticized and wrote that in Latin. Because Many of people couldn't read Latin at that time.

My feeling also same that. As I thought that can't talk about it is many topics. For example about Seitai, an emotional little rough around the edges topics, etc. For example, One day we was said to someone. “we need correct method as solution for that problem.” I think this word was rough and thoughtless.

First, we should stand by neighbor. If wouldn't doing that are we probably be sad? Everyone would rather have someone be nice to them, right?

Thank you for reading this month. We look forward to seeing you next month.
